AVONDALE NURSERIES,
READING ROAD, AT AVONDALE, NEAR CINCINNATI.

ANTHONY PFEIFFER.
Also, a New Branch of One Hundred Acres,

THE HAYFIELD NURSERIES,
Five miles above Newport, on the Ohio River, in KENTUCKY.

PFEIFFER & BLACKBURN'S
Wholesale Catalogue & Price List

OF
FRUIT & ORNAMENTAL TREES,
Shrubs, Roses; Border Plants,

AND
NURSERY SEEDLING STOCKS,

For Autumn of 1861 and Spring of 1862.

STORE AND DEPOT,
201 WALNUT STREET, CINCINNATI, OHIO.

Printed by W. T. NORMAN, Wood Engraver and Printer, 230 Walnut Street, below Sixto St.
The Prices, it will be seen, are much lower than heretofore, in order to accommodate the rates to the change and necessities of the times.

The Autumn is the best season for distant purchasers to obtain supplies of Trees and Plants, even for spring planting or spring sale. If going north, they may be wintered safely, in most severe climate, by having the roots deeply buried in trenches, in dry light sandy soils, in a sheltered situation; and if placed in a slanting position, the tops near the ground, with a few leaves or boughs of evergreens thrown over them: the most delicate and tender Trees and Plants may be wintered in this way. If going south or west, this season is also best, as the season in such localities is two to four weeks in advance of ours and with time necessary for transportation, the season of their destined place is far advanced on their arrival, and fatal draughts frequently set in adding risk to the planting.

EARLY ORDERS are desired so that we may reserve and select Plants, called for before commencement of digging. It is more convenient to ourselves, and satisfactory to purchasers. Orders in the hurry of digging, packing and shipping always run some risk of the same prompt attention that they receive at an earlier date.

EXPLICIT ORDERS should state particularly the sort and form of Trees and Plants desired—Standard, Dwarf, or Pyramid, or on what kind of stock to be worked,—the varieties and quantities of each.

When Plants are furnished at wholesale or trade prices in the Catalogue, the right is reserved to some extent of selecting varieties or sorts, consisting of the leading and desirable kinds.

Plain and express directions should be given with the order how the package should be marked, and by what route and conveyance to be forwarded, and also the names of parties to whose care they are to be consigned, at the various points of transhipment. If left to our discretion, we will exercise our best judgment, but in no case can we be responsible for any loss or detention after shipment, unless our fault.

ALL TREES AND PLANTS will be taken up with the utmost care, and packed securely according to their destination, and when skilfully taken up, handled, and packed, they suffer less during a long journey, than if improperly packed and handled during a short time.

UNPACKING Trees is important. Trees arriving in frozen weather, late in season or encountering some unexpected hard freeze, should be unpacked and heeled in so that the unfrozen earth comes in contact with the roots, or placed in a cellar unpacked until thawed; if not frozen but very dry and somewhat shrivelled, should be buried, after being unpacked, in the ground for sometime and water.
poured on the earth above them. It is much safer to receive Plants rather too dry than too moist. Plants are scarcely ever moistened in packing for long journeys, such treatment would be fatal.

TERMS OF PAYMENT must invariably be cash, or satisfactory note, payable at some bank. Orders are always expected to be accompanied with a remittance from unknown correspondents, by draft or check on some bank payable to our order, or satisfactory reference given. When banks are impossible or inconvenient, remittance may be made by any of the regular express companies.

SUGGESTIONS ON PLANTING.

PREPARATION OF THE SOIL. The roots of nearly all Plants and Trees are impatient of stagnant moisture, so that the soil should be dry, either naturally or made so by drainage, and should be subsoil-plowed. Exhausted and worn land should be manured.

PREPARATION OF THE TREES. All bruised and broken roots at the injured points should be cut on the under side, with a sloping cut, with a sharp knife, either at planting or at time of heel ing in. Next shorten in side branches and even the leader is better shortened in. This establishes a proper balance of action between root and top, for in digging and packing the system of roots must be more or less broken and reduced, and unless the top is reduced in proportion; the transplanted tree, with a full head, will make feeble and sickly foliage.

PLANTING. Dig holes large enough to allow the roots to be spread out in their natural position, say 20 inches to 2 feet deep, and 2½ to 3 feet wide; fill in the hole with earth so that the roots, resting on the filled earth and allowing for settling, shall not be deeper than before taken up, and that the tree shall stand with its top roots near the stem not more than 1 to 2 inches below general surface: fill in around the roots with mixed pulverized top earth so that it shall come in contact with every root, and, if planting early in fall or late in spring in dry weather, before the hole is filled in, water may be poured around the roots and the earth pressed gently with the foot causing the tree to stand firm in its position. Dwarf Pear Trees should always be planted one or two inches below the junction of the Pear and Quince.

Trees that are tall and much exposed to winds should be secured by a stake planted with the tree, secured to the stake in such a way as to avoid chafing the tree. After the tree is planted in this way, throw around it beyond the roots to the extent of the hole, three to six inches of manure or litter. This is half the battle in protecting the trees from our summer droughts. The ground should be kept clean and loose about them for the first few years at least, by annual cultivation in root crops.
EVERGREENS require different treatment in lifting and planting from Deciduous trees. They are always clothed with foliage which constitutes more or less the lungs or breathing apparatus of vegetable organization, sustaining thereby evaporation as Deciduous trees do in full leaf, consequently they are more impatient of exposure of their roots to the air in moving and lifting.

The preservation of their foliage requires continual sustenance, which is scantily afforded in winter when the soil is damp, cold, and unprepared to produce immediate vegetation. The equilibrium of the circulation is disturbed—the flow of sap and nourishment is arrested, so that when the evaporation has exhausted the sap remaining in the plants and leaves—at time of lifting—no new supply is on hand to replenish exhaustion, and the frosty northern winds of winter, the drying winds of spring, and the extreme and sudden changes of heat, cold, and sunshine incident to our climate, complete the ruin to which the constitution of new planted Evergreens are liable.

To obviate these difficulties the best time for transplanting should be consulted. This differs from that of Deciduous trees. For it is obvious that evergreens require the earth to be warm and prepared for vegetation when they are planted, and the atmosphere to be warm, growing and congenial.

And to comply with these requirements the best season for planting is from the beginning to middle of Autumn, as soon as possible after the new wood is matured, while the earth is yet warm from summer heat and the air congenial: or during the month of April or part of May, after the March winds have subsided and the soil begins to grow warm, and the sap is starting.

DISTANCE BETWEEN TREES IN PLANTING.

Standard Apples, 30 feet apart each way, in poor soil, 25 feet.
" Pears and Cherries, 20 feet apart each way.
" Cherries may do at 18 feet; and Dwarf growing kinds at 16 feet, such as Duke and Morellos.
" Plums at 12 to 15 feet apart each way.
" Peaches at 15 to 18 feet apart each way.
Quinces at 10 to 12 feet apart each way.
Apricots and Nectarines, same as Peaches.
Pyramidal Apples, Pears, Cherries and Plums 8 to 10 feet apart each way, greater if convenient.
Dwarf Apples on Paradis, 5 to 6 feet each way.
" Doucains, 8 to 10 feet each way.
Dwarf Cherries on Mahaleb, of Duke and Morello sorts, 8 feet each way.
" Mahaleb, of Hearts and Bigarreau, 10 to 12 ft. each way.
Currants, Gooseberries, and Raspberries 3 to 6 feet apart.
Strawberries should be planted in rows 2 to 3 ft. apart, and the plants 18 in.
FRUIT TREES.

APPLES.

Standard Trees for orchard, 2 to 3 yr. old, our selection of sorts, $1.50 $12. $100.

Dwarf Apple .......................................................... $3 per doz.

| Heath Cling | Yellow Red Rareripe |
| Haine's Early Red | Ward's Late Free. |
| Honest John | |

Numerous other varieties can be furnished when called for, but cannot be recommended until proven by further trial; nor can some of the above be recommended for Orchard culture. Some three or four of the above named are probably synonymous and many varieties, not named, if not quite, are nearly identical with these named. The most approved names here—as in the other fruits—have been used, and their identities of other names rejected, no matter how popular.

APRICOTS.

Price, on Peach Stock, 25c. each. On Plum Stock, 40c. each.

STOCKS.

Apple stock one year old selected, per. 1000 - $4.00
Quince stock one year old - - - - 14.00

QUINCES.

Apple or Orange Quince, each 25c., per. 100 - $20.00

SCIONS:

APPLE, Cherry, Plum, and Pear can be furnished of most extensive varieties, and of most desirable and leading kinds, as well as of the newest and most promising.
CEDAR OF LEBANON.

ORNAMENTAL DEPARTMENT.

EVERGREENS.

White Spruce, *Abies alba*, 1 foot high, 75¢ to $1.
Norway Fir, *Abies excelsa*, from 18 inch to 9 feet, transplanted, 25¢ to $3.50 each, according to size; and from 2 to $25 per dozen.
Hemlock Fir, *Abies canadensis*, 18 inch to 9 feet, transplanted, 50¢ to $3 each; $5 per doz., smaller size.
Silver Fir, *Abies pectinata*, 9 inch to 5 feet, $1 to 3 each.
Balsam Fir, *Abies balsamea*, 2 to 4 ft. 75¢ to 1.50.
Chinese Arbor Vitae, *Thuja Sinensis*, 1 to 3 feet, 25¢ to $1 each.
Arbor Vitae Plicata, *Thuja plicata*, 2 to 3 feet, $1 to 1.50 each.
Siberian Arbor Vitae, *Thuja siberica*, 2 feet, 50¢ to 75¢ each.
American Arbor Vitae, *Thuja occidentalis*, 18 in. to 2 ft. 40 to 60¢ c. $3 doz.
Weymouth Pine, *Pinus strobus*, 1 to 6 feet, 50¢ to $3 each; $4 to 20 p. doz.
Scotch Pine, *Pinus sylvestris*, 2 to 4 ft. 50¢ to 1.50 each, $4 to 9 per doz.
Austrian Pine, *Pinus austriaca*, 2 to 4 feet, 50¢ to 75¢ each; $5 to 10 per doz.
Savin Juniperus sabina 25 to 75¢ each.
Sweedish Juniper Juniperus suecica 9 inches to 3 feet 25¢ to $1.75 each.
Irish Juniper, *Juniperus hibernica* 1 to 3 feet, 50¢ to $2 each.
Red Cedar, *Juniperus Virginiana*, 1 to 2 feet, 25 to 75¢ each.
Tree Box, *Buxus Arboresecens*, 1 to 3 feet 25¢ to $1 each, 2 to $9 per doz.
Dwarf Box, 25¢ per yd. 2 to 3 p. doz. yds.
Ashberry Hollyleaf, *Mahonia aquifolia* 1 to 2 feet, 50¢ to $1 each.

New and Rare Evergreens.

Russian Pine, *Pinus rigensis*, 18 inch to 2 feet, 75¢ to $1 each.
Pinus Halepensis, 1 to 2 feet 75¢ to $1
Pinus Haguensis, 1 to 2 feet 75¢ to $1.25
Pinus Palliaisiana, 1 to 2 feet 75¢ to $1
Pinus Monticola, 1 foot $1.
*Thuja Aurea* 1 foot 50¢.
Cedar of Africa, *Cedrus africana*, 6 to 18 inches 75¢ to $1.50.
Pinus Laricio corsica, 18 inches $1.
Pinus Pungens, 18 inches $1 each.
Abies Celicia, 8 inches $1 each.
Abies Pinsapo, 5 inches $1 each.
Cryptomeria, *Japonica*, Young plants, 50¢ each.
Cedar of Lebanon, *Cedrus Libani*, 6 to 18 inch, 75¢ to $1.50 each.
Yew, Irish, *Taxus hibernica*. 
Dichrous Ornamental Trees.

**Silver Poplar, Populus alba**, 5 to 10 ft. 25c to $1 each, 2 to 88 per doz. Ash, *Amer.*, 3 to 7 ft., 25 to 50c each. Catalpa, 8 feet, 25 to 50c. Cherry, double-flowering, *Cerasus flore pleno.*

- *Chinese* " " " *sinensis.*
- *Common Bird* " *padus communis.*
Thorn, *Crataegus,* double white " " " rose " " " scarlet " Cypress, deciduous, 5 feet, 50c each. Elm, *American,* 5 to 7 feet, 25 to 40c. Horse Chestnut, 25 to 50c each. Linden, *Tilia,* " " Magnolia, *acuminata,* 40c each. Maple, *silver,* 6 to 8 feet, 20 to 25c each $5 per 100. Mountain Ash, 6 to 7 ft, 30 to 60c each. Rosemary Willow, 50c each. European Larch, 5 to 9 ft, 25c to $1. Maple-leaved Poplar, 5 to 7 feet, 25 to 40c each. Lombard Poplar, 6 to 8 ft, 25 to 50c each. Sugar Maple, 25 to 50c.

Also, Michropilla -- Carnea & Odorat. Musk Cluster—Hebermont. Sunwell's Scotch Perpetual.
Climbers—Baltimore Belle, Prairie Queen. Laura Davoust, Anna Maria, & others of their kinds.
We have also always on hand a few Variegated Annual Roses, viz: George Viber and La Rubance. Yellow Roses—Persian and Harrison Yellow.

**Camellias.**—The collection of this chaste and beautiful plant is probably as fine as any in the West, consisting of about 40 varieties. Their cultivation has received from the proprietors more than ordinary attention and care, with more than ordinary success; and they now present a rare opportunity to the lovers of this elegant flower to indulge and gratify their taste.

**Green & Hot House Plants.**—A large and general assortment of these plants are on hand and invite the attention of amateurs, conservatory proprietors and the trade.

**Chrysanthemums.**—A large assortment of the lillipution and large flowering varieties of this indispensable fall flower, cannot escape the notice of the most indifferent and uncultivated, taste and commend themselves to the attention of all purchasers.

**Dahlias.**—A large and selected collection of this magnificent fall flower are now growing, no pains having been spared to provide for their demand, and to please the most fastidious cultivator.

**Verbena.**—An extensive collection, including all the varieties of any merit, from the common to the newest and most approved sorts, are in cultivation, and prepared for delivery to purchasers.

Attention is also invited to the collection and stock of Geraniums, Pelargoniums, Carnations, Pinks, Daisies, Polyanthus, Auriculas, Pansies, Primroses, Phloxes, Petunias, and other hardy and herbaceous flowering plants, for the border and bedding out.

**Garden, Vegetable and Flower Seeds of every variety.**
